New England Aquarium: Gulf of Maine - Aerial Surveys 2023-2024

Type File Geodatabase Feature Class

Tags RWSC, New England Aquarium, Gulf of Maine, Marine Mammals, Aerial Surveys, whale

Summary

This layer depicts transects from the New England Aquarium's aerial surveys conducted from 2023-2024 in the coastal Gulf of Maine area. The New England Aquarium received funding from an anonymous fund at the Maine Community Foundation to operate systematic aerial surveys in the waters off Maine from September - January. Observers record data for all marine species seen during the surveys. The surveys use line-transect methodology, which will be used to build a data set that can be used to estimate abundance for species with an adequate number of sightings. If right whale aggregations are detected visually or acoustically, directed aerial surveys will be conducted to photograph the whales, to allow for demographics studies (e.g., the number of males versus females, adults versus juveniles, etc.).

Description

This layer shows the route the New England Aquarium runs their Gulf of Maine aerial surveys. The survey process is described in detail here: https://www.masscec.com/resources/marine-mammal-and-sea-turtle-surveys

The Gulf of Maine surveys are run from September through January. The surveys use line-transect methodology but if right whale aggregations are detected visually or acoustically directed surveys will be conducted to photograph the whales which will allow for demographics studies.

Use limitations

These data will be used by RWSC and its expert Subcommittees, partners, and other participants to implement the Science Plan, including to understand the extent of ongoing and planned data collection activities, and to coordinate and plan future data collection and research activities with respect to offshore wind. The data will be displayed via online mapping platforms.

Definition
Attribute table prepared by RWSC

Definition source
RWSC

Field OBJECTID ►
Alias ⇔ OBJECTID
Data type ⇔ OID
Width ⇔ 4
Precision ⇔ 0
Scale ⇔ 0

Field description ⇔
Internal feature number.

Description source ⇔
Esri

Description of values ⇔
Sequential unique whole numbers that are automatically generated.

Field Shape ►
Alias ⇔ Shape
Data type ⇔ Geometry
Width ⇔ 0
Precision ⇔ 0
Scale ⇔ 0

Field description ⇔
Feature geometry.

Description source ⇔
Esri

Description of values ⇔
Coordinates defining the features.

Field OPERATOR ►
Alias ⇔ OPERATOR
Data type ⇔ String
Width ⇔ 254
Precision ⇔ 0
Scale ⇔ 0

Field description
The primary affiliation for the operator of the device

Description source
RWSC

Description of values
Unique name affiliation.

Field POC_EMAIL ►
Alias ⇔ POC_EMAIL
Data type ⇔ String
Width ⇔ 254
Precision ⇔ 0
Scale ⇔ 0

Field description
Email for the primary point of contact

Description source
RWSC

Description of values
Email for the primary point of contact

Field PROJECT_NAME ►
Alias PROJECT_NAME
Data type ⇔ String
Width ⇔ 254
Precision ⇔ 0

Scale ⇔ 0

Field description
Name of the project

Description source
RWSC

Description of values
Unique project name.

Field PATH_NAME ►
Alias ⇔ PATH_NAME
Data type ⇔ String
Width ⇔ 254
Precision ⇔ 0
Scale ⇔ 0

Field description
The route ID.

Description source
RWSC

Description of values
Unique path identification.

Field START_YEAR ►
Alias ⇔ START_YEAR
Data type ⇔ Integer
Width ⇔ 4
Precision ⇔ 0
Scale ⇔ 0

Field description
The start year in the YYYY format for the start of usable data for that path (i.e. the surveys are conducted in structured survey form).

Description source
RWSC

Description of values
Year in YYYY format.

Field END_YEAR ►
Alias ⇔ END_YEAR
Data type ⇔ Integer
Width ⇔ 4
Precision ⇔ 0
Scale ⇔ 0

Field description
The end date in the D-Month format for the end of the typical survey season. (*NOT an actual date field, keeping it as text so that it doesn't add a default year)

Description source
RWSC

Description of values
Text end date for season.

Field START_DATE ►
Alias ⇔ START_DATE
Data type ⇔ String
Width ⇔ 254
Precision ⇔ 0
Scale ⇔ 0

Field description
The start date in the D-Month format for the start of the typical survey season. (*NOT an actual date field, keeping it as text so that it doesn't add a default year)

Description source
RWSC

Description of values
Text start date for season.

Field END_DATE ►
Alias ⇔ END_DATE
Data type ⇔ String

Width ⇔ 254
Precision ⇔ 0
Scale ⇔ 0

Field description
The end year in the YYYY format for the end of usable data for that path (i.e. the surveys are conducted in structured survey form). (*Default set to 2050 if no available end year)

Description source
RWSC

Description of values
Year in YYYY format.

Field FREQUENCY ►
Alias ⇔ FREQUENCY
Data type ⇔ String
Width ⇔ 254
Precision ⇔ 0
Scale ⇔ 0

Field description
Proposed/approximate frequency of surveys throughout the survey season

Description source
RWSC

Description of values
Unique frequency measure.

Field PROJECT_LINK ►
Alias PROJECT_LINK
Data type ⇔ String
Width ⇔ 254
Precision ⇔ 0
Scale ⇔ 0

Field description
Link to the project entry in the RWSC database if applicable

Description source
RWSC

Description of values
Unique link address.

Field DATE_SUBMITTED ►
Alias DATE_SUBMITTED
Data type ⇔ Date
Width ⇔ 8
Precision ⇔ 0
Scale ⇔ 0

Field description
The date the shapefiles were sent to the RWSC

Description source
RWSC

Description of values
Date field.

Field DATE_ADDED ►
Alias ⇔ DATE_ADDED
Data type ⇔ Date
Width ⇔ 8
Precision ⇔ 0
Scale ⇔ 0

Field description
The date the entries were added to map

Description source
RWSC

Description of values
Date field.

Field LABEL ►
Alias LABEL

Data type ⇔ String
Width ⇔ 254
Precision ⇔ 0
Scale ⇔ 0

Field description
The proposed layer name to appear in the table of contents

Description source
RWSC

Description of values
Unique label for use in symbology.

Field Shape_Length ►
Alias ⇔ Shape_Length
Data type ⇔ Double
Width ⇔ 8
Precision ⇔ 0
Scale ⇔ 0

Field description ⇔
Length of feature in internal units.

Description source ⇔
Esri

Description of values ⇔
Positive real numbers that are automatically generated.
