

Center for Coastal Studies: Eastern Outer Shore - Aerial Surveys 2021-2024

Type Enterprise Geodatabase Feature Class

Tags RWSC, CCS, Eastern Outer Shore, Aerial Surveys, Marine Mammals, whale

Summary

This layer represents transects from the Center for Coastal Studies’ aerial surveys conducted from 2021-2024 along Cape Cod’s Eastern Outer Shore. These lines show only the planned routes for the aerial surveys and are displayed for planning and research coordination purposes.

Description

This layer represents transects from Center for Coastal Studies’ aerial surveys conducted from 2021-2024 along Cape Cod’s Eastern Outer Shore. CCS conducts Aerial surveys each winter in support of research on North Atlantic right whale population, ecology and human impacts. Aerial platforms allow researchers to survey the area more extensively in less time than vessel surveys would allow. Feeding right whales can swim slowly, mere feet below the surface for over twenty minutes. From the air, observers can see into the water and can track a subsurface whale until it emerges for a breath.

The main objective of the observers on board is to locate and document right whales. When a right whale is sighted, the plane breaks from its current track line to circle over the whale. The observers quickly record the position, how many whales are present, dive times and behaviors. Whales are also checked for signs of entanglement. One of the observers is responsible for obtaining identifying photographs of the whale. Right whales are identified by the patterns of callosities found on the top of the head. From the bird’s eye perspective of the airplane, the top of the whale’s head and a dorsal view of the body is easily photographed. Photographing the body is important as scars along the body and flukes can assist in identifying the individual whale.

The surveys are conducted from January through May and are typically done once a month during that period. They used a line-transect methodology flying a series of east-west track lines that are spaced 3 nm apart.

For more information visit project site: <https://coastalstudies.org/our-work/right-whale-research/population-monitoring/> ; and RWSC database project page: <https://database.rwsc.org/details?recordId=rec8uYmbwmSLZaQOb>

These shapefiles display just the planned routes, to view the realized routes from all completed surveys visit: <https://whalemap.org/#map>

Use limitations

These data will be used by RWSC and its expert Subcommittees, partners, and other participants to implement the [Science Plan](#), including to understand the extent of ongoing and planned data collection activities, and to coordinate and plan future data collection and research activities with respect to offshore wind. The data will be displayed via online mapping platforms.

Description of values ↔
Coordinates defining the features.

Field OPERATOR ▶
Alias ↔ OPERATOR
Data type ↔ String
Width ↔ 254
Precision ↔ 0
Scale ↔ 0

Field description
The primary affiliation for the operator of the device

Description source
RWSC

Description of values
Unique name affiliation.

Field POC_EMAIL ►

Alias ⇔ POC_EMAIL
Data type ⇔ String
Width ⇔ 254
Precision ⇔ 0
Scale ⇔ 0

Field description
Email for the primary point of contact

Description source
RWSC

Description of values
Unique email addresses.

Field PROJECT_NAME ►

Alias PROJECT_NAME
Data type ⇔ String
Width ⇔ 254
Precision ⇔ 0
Scale ⇔ 0

Field description
Name of the project

Description source
RWSC

Description of values
Unique project name.

Field PATH_NAME ►

Alias ⇔ PATH_NAME
Data type ⇔ String
Width ⇔ 254
Precision ⇔ 0
Scale ⇔ 0

Field description
The route ID.

Description source
RWSC

Description of values
Unique path identification.

Field START_YEAR ►

Alias ⇔ START_YEAR
Data type ⇔ Integer
Width ⇔ 4
Precision ⇔ 10
Scale ⇔ 0

Field description
The start year in the YYYY format for the start of usable data for that path (i.e. the surveys are conducted in structured survey form).

Description source
RWSC

Description of values
Year in YYYY format.

Field END_YEAR ►

Alias ⇔ END_YEAR
Data type ⇔ Integer
Width ⇔ 4
Precision ⇔ 10
Scale ⇔ 0

Field description
The end year in the YYYY format for the end of usable data for that path (i.e. the surveys are conducted in structured survey form). (*Default set to 2050 if no available end year)

Description source
RWSC

Description of values
Year in YYYY format.

Field START_DATE ►

Alias ⇔ START_DATE
Data type ⇔ String
Width ⇔ 254
Precision ⇔ 0
Scale ⇔ 0

Field description

The start date in the D-Month format for the start of the typical survey season. (*NOT an actual date field, keeping it as text so that it doesn't add a default year)

Description source
RWSC

Description of values

Text start date for season.

Field END_DATE ►

Alias ⇔ END_DATE
Data type ⇔ String
Width ⇔ 254
Precision ⇔ 0
Scale ⇔ 0

Field description

The end date in the D-Month format for the end of the typical survey season. (*NOT an actual date field, keeping it as text so that it doesn't add a default year)

Description source
RWSC

Description of values

Text end date for season.

Field FREQUENCY ►

Alias ⇔ FREQUENCY
Data type ⇔ String
Width ⇔ 254
Precision ⇔ 0
Scale ⇔ 0

Field description

Proposed/approximate frequency of surveys throughout the survey season

Description source
RWSC

Description of values

Unique frequency measure.

Field PROJECT_LINK ►

Alias PROJECT_LINK
Data type ⇔ String
Width ⇔ 254
Precision ⇔ 0
Scale ⇔ 0

Field description

Link to the project entry in the RWSC database if applicable

Description source
RWSC

Description of values

Unique link address.

Field DATE_SUBMITTED ►

Alias DATE_SUBMITTED
Data type ⇔ Date
Width ⇔ 8
Precision ⇔ 0
Scale ⇔ 0

Field description

The date the shapefiles were sent to the RWSC

Description source
RWSC

Description of values

Date field.

Field DATE_ADDED ▶
Alias ↔ DATE_ADDED
Data type ↔ Date
Width ↔ 8
Precision ↔ 0
Scale ↔ 0

Field description
The date the entries were added to map

Description source
RWSC

Description of values
Date field.

Field LABEL ▶
Alias LABEL
Data type ↔ String
Width ↔ 254
Precision ↔ 0
Scale ↔ 0

Field description
The proposed layer name to appear in the table of contents

Description source
RWSC

Description of values
Unique label for use in symbology.
